

Advertising Campaign

Audit Report

Audit Report

Overview

Date: April 27, 2025

Account: 236-097-5037

Auditor: Asim Khan

Executive Summary:

The Google Ads account demonstrates a significant investment with a substantial number of paid users. While conversions are being generated solely through the Search campaign, the Cost Per Acquisition (CPA) for form submissions is relatively high. This report highlights key areas for optimization focusing on enhanced tracking, budget allocation, lead generation volume, and conversion rate optimization.

Observations

High Reliance on Paid Traffic: A significant majority (84.6%) of website visitors originate from Google Ads, indicating a strong dependence on paid advertising.

Search Campaign Effectiveness: The Search campaign is currently the sole driver of trackable online conversions (form submissions).

High Cost Per Acquisition (CPA): An average CPA of AED 620 for form submissions is relatively high and presents an opportunity for optimization to improve ROI.

Significant Conversions: A substantial number of leads are generated through WhatsApp and landline, which are currently not directly tracked within Google Ads as online conversions.

Consistent Daily Spend: The average daily spend of AED 3,000 suggests a consistent budget allocation, which might benefit from strategic adjustments based on performance.

Recommendations

To improve the performance and efficiency of your Google Ads account, I recommend focusing on the following areas:

- **Google Analytics Tracking Optimization:** Ensure all relevant website actions (beyond form submissions) are set up as goals in Google Analytics. This includes tracking button clicks, time spent on key pages, and other engagement metrics.
- **Call Tracking Conversions:** Implement conversion tracking to capture the 1500+ leads generated through WhatsApp and landline with CRM. This will provide a more holistic view of your campaign performance.
- **Form Conversion:** Ensure all relevant conversion actions are accurately configured and firing correctly within Google Ads.
- **Performance Based Allocation:** Analyze the performance of different ad groups and keywords within the Search campaign. Reallocate budget towards the top-performing areas to maximize conversions.
